West

Thundering hooves of bison and horses across the plains, rugged mountain ranges, hidden coastal coves, and towering Sequoia trees help to make the West region unique. Imagine yourself amidst the breathtaking beauty of one of the many western lakes and recreation areas managed by the U.S. Army Corps of Engineers. These areas offer an array of ways to enjoy nature including hiking, fishing, camping, swimming, picnicking, educational programs, and wildlife viewing. Our work in this region includes efforts such as building the roads, bridges, and aquaducts of Yellowstone National Park, developing harbors along the Pacific coast, building hydropower facilities, providing drinking and irrigation water to thirsty areas, and constructing the North American Aerospace Defense Command (NORAD). We hope this brochure will provide you with the information you need to plan your visit.

Fees

Corps facilities are carefully planned and operated to promote the use of land and water while conserving the natural environment. In addition to recreation management, our stewardship includes forestry, fish and wildlife management, archeology, soil conservation, and more. In order to defray the costs of providing these public services, most Corps parks and recreation areas charge a separate fee for camping, use of swimming beaches and boat launching ramps, and may charge a separate fee for group use. Land around our lakes is often leased for agricultural purposes, or to state parks, state and national wildlife refuges and fish hatcheries, and businesses such as marinas, stores, and resorts. These areas may have additional regulations and charge separate fees.

Rules and Regulations

We want to ensure that your visit is always safe and enjoyable.

Safety in the use of our facilities is your responsibility. We encourage you to observe all safety rules and use common sense while visiting. Be alert to natural hazards such as submerged stumps, logs, rocks, and sandbars. Children should be closely supervised. Feel free to contact a park ranger for more safety information.

Corps lakes and facilities operate under federal regulations established by the Secretary of the Army and administered by federal officials in the interest of public safety and to protect the rights of all visitors. Complete rules and regulations are posted at the parks, and copies are available from the manager's office.

You may encounter access limitations due to national security concerns in some instances. Violators of Corps regulations may be subject to a citation or an appearance in federal court.

Corps Recreation Today

- 456 lakes in 43 states hosting 33% of all freshwater lake fishing
- 56,000 miles of shoreline
- 4,000 recreation sites with 80% within 50 miles of a metropolitan area
- 101,000 campsites
- 3,800 boat ramps
- 5,000 miles of trails
- 200,000 fishing tournaments annually
- 12 million acres of land and water hosting 20% of all federal recreation area visits on 2% of federal lands

Caring for Our Lands and Waters

Corps recreation areas belong to you and all Americans. You can help care for your public lands and waters in many ways. Observe rules designed for your safety and for the protection of the park and its natural resources. Help preserve these areas for future generations. Join our volunteer program. Participate in activities like forest, wildlife, or fisheries management, clean-up events, trail maintenance, or volunteering at a visitor center.

- Check the weather forecast for your outing and plan clothing, equipment, and supplies accordingly
- Let someone know your itinerary and when to expect your return
- Travel and camp only where permitted
- Dispose of waste properly
- Leave what you find - do not remove items
- Minimize campfire impacts
- Respect the environment and the rights of others

The four major causes of drownings are:

- ✔ Not wearing a life jacket;
- ✔ Abuse of alcohol;
- ✔ Lack of sufficient swimming skills;
- ✔ Hypothermia

Wear your life jacket!

For over 200 years the Corps has served the nation with programs such as waterway navigation, floodwater control, disaster assistance, hydroelectric power generation, water supply, environmental restoration, and outdoor recreation. As the leading federal provider of recreation, one out of every ten Americans visits a Corps lake or recreation area annually to enjoy the 12 million acres of land and water entrusted to our stewardship. These visitors spend nearly $15 billion on trip expenses and durable goods annually resulting in 500,000 jobs nationwide.

HEALTHIER US.GOV

The U.S. Army Corps of Engineers is the steward of the lands and waters at Corps water resources projects. Its Natural Resource Management Mission is to manage and conserve those natural resources, consistent with ecosystem management principles, while providing quality public outdoor recreation experiences to serve the needs of present and future generations.

In all aspects of natural and cultural resources management, the Corps promotes awareness of environmental values and adheres to sound environmental stewardship, protection, compliance, and restoration practices.

The Corps manages for long-term public access to, and use of, the natural resources in cooperation with other federal, state, and local agencies as well as the private sector.

The Corps integrates the management of diverse natural resource components such as fish, wildlife, forests, wetlands, grasslands, soil, air, and water with the provision of public recreation opportunities. The Corps conserves natural resources and provides public recreation opportunities that contribute to the quality of American life.

Notes:

- Pets must be on leash and controlled.
- Hunting and fishing are allowed in authorized areas, and in accordance with state and local laws.
- Reservations may be made for many campsites and large picnic shelters.
- Federal Discount passes are honored at facilities managed by the Corps and other federal agencies only.
- Some universally accessible facilities such as restrooms, campsites, and trails are available. Contact field office for more information.

Other Features:

1. Amphitheater
2. Educational programs
3. Visitor Information Center
4. Fish cleaning station
5. Water sports rental such as jet skis, houseboats, fishing boats, etc., are available.*
6. Winter sports such as snow skiing, ice skating, and ice fishing are available
7. Horseback riding
8. Sanitary dump station
9. Groceries / supplies*

★*Facilities are located on Corps lands but managed by others.

@50-amp service is available at some areas.
